SANGAMON CO.  
SPRINGFIELD/MORECO  
COMPLIANCE

Dear Mr. Jansen:

Reference our telephone conversation of August 21, 1989, regarding removal of General Tire waste oil from the Moreco facility in Springfield, by James Walker, Sludge Management Systems, Inc., 1701 Camp Lincoln Road, Springfield, IL.

Enclosed are copies of the original manifest for 78 shipments of waste oil from the General Tire facility in Mt. Vernon, IL, as you requested. Shipments were made from July 23, 1987, to November 14, 1988. Shipments included 272,150 gallons in 5,443 drums and 19,700 gallons by tank truck for a total of 291,850 gallons.

We are told by James Walker there are 1,361 drums from General Tire presently at the Moreco site. Waste oil from General Tire's facilities in Mayfield, KY and Bryan, OH, are included in the 1,361 drums. Mr. Walker was in the process of negotiating removal of the General Tire drums prior to IEPA closure and has isolated our material from other material at the site.

The material to be removed from the Moreco site by Mr. Walker is to be pumped out of the drums on site by Safety Kleen Oil Services, Inc. for disposal by burning as supplemental fuel. The solids portion of the drums is to be solidified in the drum with clay acceptable for landfill and disposed of in the Perry County Landfill, DuQuoin, IL.

General Tire would like to expedite removal of our material from the Moreco site. If this approach is acceptable to you, we will advise you of when Mr. Walker can begin removal such that the operation may be witnessed by your representatives.

We appreciate your willingness to work with General Tire in minimizing our liability in cleanup of this site.

Sincerely,

GENERAL TIRE

*Keith Pearson*  
Keith Pearson  
Environmental Engineer
